

ADEC Welcomes HAN University as First International Member

The American Distance Education Consortium (ADEC) has recently welcomed the Hogeschool van Arnhem in Nijmegen (HAN) as its first international member. Dr. Oliver Grundmann, ADEC Executive Chair, met with Dr. Remko Bosch, Associate Professor in the Master in Molecular Life Sciences program, and other faculty members in April of 2015 to establish the initial collaboration with the University of Florida and initiate the process for HAN to become an ADEC member.

HAN University of Applied Science is a public university based in the city of Nijmegen located on the eastern border of the Netherlands. The campus offers Bachelors and Masters Programs in Science and Engineering, as well as undergraduate and graduate programs within the business, management, and social sectors. In addition to beginning its collaboration with the University of Florida (UF) in 2015, HAN has established both domestic and international connections with several European academic institutions.

Please join us in welcoming HAN University to the ADEC family. If you are interested in learning more about the unique collaboration of UF and HAN University, please contact Oliver Grundmann via email at chair@adec.edu.
